

VALERIE L. JONES, O.D.

Our office is now offering a variety of screener tests in the office for early detection of eye diseases.

THESE TESTS ARE NOT PREVENTIVE AND ARE NOT COVERED BY INSURANCE.

Frequency Doubling Technology Test (FDT)- This test helps detect early visual field loss or peripheral vision loss. The instrument can detect brain tumors, aneurysms, glaucoma, retinal and macular degeneration. If you have family history of any of the previous disease conditions this test would be beneficial.

This procedure has a fee of \$10.00 _____ YES _____ NO

AdaptDx- This test measures how long it takes you to adjust from a bright light down to a dim light. It can show sub-clinical signs of Macular Degeneration. This test is ideal if you have difficulty seeing in the dark, difficulty navigating at night, difficulty reading in dim light or other night vision problems.

This procedure has a fee of \$10.00 _____ YES _____ NO

Optical Coherence Tomography (OCT) Eye exams generally include a look at the front of the eye and the retina to evaluate health and prescription changes, a thorough screening of the retina is critical to verify that your eye is healthy. This can lead to early detection of common disease, such as glaucoma, diabetes, macular degeneration, and even cancer.

OCT Macula- This test takes an image of the macula in the back of the eye. This test would be ideal for patients who have a family history of Macular Degeneration (AMD), diabetes, or anyone who currently has diabetes and has never had the imaging.

This procedure has a fee of \$30.00 _____ YES _____ NO

OCT Optic Nerve Head- This test takes and image of the optic nerve in the back of the eye. This test would be ideal for patients who have a family history of glaucoma or anyone who currently has glaucoma and has never had the imaging.

This procedure has a fee of \$30.00 _____ YES _____ NO

If you would like to have all tests listed above we have a Wellness Bundle of \$65.00
