

**VALERIE L. JONES, O.D.**

---

Our office is now offering a variety of screener tests in the office.

***These tests are not preventive and are not covered by insurance.***

**Frequency Doubling Technology Test (FDT)** – This test helps detect early visual field loss or peripheral vision. The instrument can detect brain tumors, aneurysms, glaucoma, retinal and macular degeneration. If you have a family history of any of the previous disease conditions this test would also be beneficial.

This procedure has a fee of \$10.00. \_\_\_\_\_ YES \_\_\_\_\_ NO

**Optical Coherence Tomography (OCT)** - Eye exams generally include a look at the front of the eye and the retina to evaluate health and prescription changes, a thorough screening of the retina is critical to verify that your eye is healthy. This can lead to early detection of common diseases, such as glaucoma, diabetes, macular degeneration, and even cancer.

**OCT-Macula (MacSc)**- This test takes an image of the macula in the back of the eye. This test would be ideal for patients who have a family history of Macular Degeneration (AMD), diabetes, or anyone who currently has diabetes and has never had the imaging.

This procedure has a fee of \$30.00. \_\_\_\_\_ YES \_\_\_\_\_ NO

**OCT- Optic Nerve Head (OPNSc)**- This test takes an image of the optic nerve in the back of the eye. This test would be ideal for patients who have a family history of glaucoma or anyone who currently has glaucoma and has never had the imaging.

This procedure has a fee of \$30.00. \_\_\_\_\_ YES \_\_\_\_\_ NO

If you would like to have both the OCT-Macula and the OCT-Optic Nerve Head we do offer a bundle price of \$55.00 (**Bund1**).
